Title: Reflecting topological properties

Authors: Lúcia R. Junqueira (Universidade de São Paulo, Brazil)

Abstract: We will discuss reflection of topological properties, looking in particular at reflection in continuous images of small weight. A topological property \mathcal{P} is reflected in continuous images of weight at most ω_1 if a space X has \mathcal{P} whenever every continuous image of X of weight at most ω_1 has \mathcal{P} . We will present some recent results.
